D-Diet
Dialysis Diet Charts

New mobile application
D-Diet: Dialysis Diet Charts

For both new and existing patients who want to avoid their problems with fluid intake and dialysis diet

Do you have problems with monitoring your **fluid intake**?

Do you often have a high value of **potassium** or **phosphates**?

Here is a new mobile application for smartphones which will help you to manage these: **D-Diet**

It contains a detailed table with more than **600** items od **foods** and **drinks** including their values (potassium, phosphorus, and water)

Clear **indicative charts** show your current state of K, P, and water in between 2 HD sessions

Now also with new **advanced functionality**!

Freely downloadable from Google Play
